Osborn associates walk for a good cause

September 2013

One step ahead

Starting September 22nd many Osborn associates want to be “one step ahead”, because they take part in the International Osborn Stepping-Contest. Over a period of six weeks the participants voluntarily wear a pedometer. Every step they do at work and in their spare time is being counted. The big target is to collect as many steps as possible. Together in international teams of five to seven associates the steps are being added. At the end of six weeks the three teams with the most steps collected will win the contest.

Besides contributing to their own health and the mutual fun taking part in the contest, the three best teams will be rewarded. Each team had to name a charity organization they would like to support. Osborn’s parent company Jason Inc. (Milwaukee, USA) will donate 2.500 / 1.000 / 500 US Dollar to the selected organizations of the three winning teams.

Worldwide 109 associates from five different Osborn locations take part in the competition.
