FOR IMMEDIATE RELEASE:

Osborn Fills the Gap with Three Tiers of Finishing Solutions

Standard, Professional and Premium finishing lines fit different environments, applications and budgets of Osborn's customers

CLEVELAND – February 2013 – [Osborn's](#) Standard, Professional and Premium lines of brushes provide a finishing solution for virtually every application and to fit any budget.

- Osborn Standard brushes are designed with the DIY user in mind and offer general-purpose performance for light-duty projects including light rust removal and small welding applications.
- Osborn Professional brushes are designed to tackle heavier corrosion and larger welds with improved component materials and tool construction.
- Osborn Premium brushes are Osborn's gold-standard products that are made with the highest quality materials and construction. These brushes tackle heavy-duty welding, pipeline and automotive applications with superior performance.

“Osborn recognizes that our different customers require different brushes for their varied applications. We're proud to offer three levels of brushes to provide our customers with the best value,” said Jeff Naymik, marketing manager at Osborn. “Value is where performance and price meet, which is why these brushes are able to fill the gaps in individualized needs.”

Each distinct tier of brush is designed to fit specific budgets and applications, and all are backed by Osborn's commitment to value and performance.

Osborn is the world's leading supplier of surface treatment solutions and high-quality finishing tools for hundreds of industrial and commercial applications such as metal finishing, honing and surface polishing. Celebrating its 125th anniversary in 2012, Osborn now includes operations in 15 countries and serves customers in more than 100 countries. A unit of Jason Inc., Osborn carries more than 10,000 standard products and more than 100,000 customized solutions to serve a diverse of group customers and industries.
