FOR IMMEDIATE RELEASE:

### **Osborn Offers Complete Line of Metal Finishing Solutions**

CLEVELAND – September 2012 – [Osborn](#) offers a complete line of metal finishing products.

Popular go-to metal finishing products available from Osborn include:

- **ATB™ Wheel Brushes.** The complete line of advanced technology brushing wheel brushes includes narrow- and wide-face models, small ring locks and specialty treated configurations. The brushes feature abrasive nylon filaments that eliminate the need to clean finished surfaces on metallic and non-metallic surfaces.
- **ATB Disc Brushes.** Available in three standard stock configurations, max density, turbo and standard, the disc brushes are reliable, high-performance tools with consistent quality. These flexible brushes easily integrate into automated machinery, CNC machining centers, transfer lines and robotic cells.
- **NovoFlex Flexible Honing Tools.** These self-centering tools will conform to the bore surface and provide a consistent, even surface finish. They feature round, abrasive beads at the end of flexible filaments with either silicon carbide or aluminum oxide grit.

All Osborn abrasive products are designed for superior performance and long life, using durable materials.

“At Osborn we’re proud to offer our customers an extensive metal finishing line and a large array of standard products,” said Jeff Naymik, marketing manager at Osborn. “We also pride ourselves on engineering custom finishing solutions for every application.”

Osborn is the world’s leading supplier of surface treatment solutions and high-quality finishing tools for hundreds of industrial and commercial applications such as metal finishing, honing and surface polishing. Celebrating its 125th anniversary in 2012, Osborn now includes operations in 15 countries and serves customers in more than 100 countries. A unit of Jason Inc., Osborn carries more than 10,000 standard products and more than 100,000 customized solutions to serve a diverse of group customers and industries.
