A top gloss in just three steps

Osborn presents Premium Polishes

(Burgwald). Osborn has developed a new range of polishes with the focus on the DIY-market. The polishes are easy to use and come in handy sized dispensers covering different application areas for automotive and household. StarPolish will be presented at Cologne Hardware Fair from March 4th - 7th 2018.

While the primary focus for Osborn polishing compounds is heavy industrial applications, this range has been developed with a clear focus on everyday end users. Sue Reavey-Sutter, Sales Manager Polishing at Osborn, explains: "While polishing is usually a highly sophisticated interaction of polishing compound and the corresponding polishing buff, this time we set ourselves the target to make polishing as easy as possible".

Indeed, just three steps are necessary to achieve a glossy shine: Applying the polish with a damp sponge, rubbing it in and cleaning it off with a soft cloth. The result is a surface that is cleaned, polished and protected. StarPolish is produced at Osborn's compound manufacturing facility in Haan/Germany. The polishes are water soluble, silicon- and acid-free.

Six special formulas are available, specially produced to polish silver, stainless steel, jewellery, lacquer, chrome and aluminium. Two matching display boxes containing 5x3 bottles are available for dealers to present the products directly at the point of sale.

StarPolish Premium Polishes will be introduced at the Cologne Hardware Fair from 4th - 7th March 2018 on the joint Osborn and Dronco stand. Hall 10.2, Booth H61.
